

Chester Sp.

31. 3. 39

Dear George & Susan,

Thank you for the of
Deere magazine.

I have been working with gas masks
tinning them around 1,000 & taking
them to the different wards, the ones
here are about as useful as the
goggles that had one eye piece
instead of two, they fog up badly.
Mother wrote to Dr. Flinn, but he would
not let me go home, yet others that
have run away since me are
allowed home, & did not run for ^{that reason} ~~that I had~~.
I would like to prove I was right
with a Royal Canadian Mounted Police
like R.C.M.P. Barker of Broadview
in law court in London.

The case has gone so long it is hard to hold all the facts together.

They will not take my words here so that is what causes so many of the accidents in the air force, yet I know St Buccannon is wrong but I do not know his reason for being wrong, unless it is a Rank that he is doing it for some big bag with money.

I went to a picture last night called Bob, the first half fitted in a lot with events that had happened in the last 4 years.

I will send you an account similar to my case, please keep it as I may need it for reference for my pay if I prove

I am right, put it in my small
draw.

I think a Oliver Superint seeds
to be a very suitable make by the
Free Press advertisements, specially specially
for seeding shallow.

We had a day of rain.

What is the pay for a Dominion M.P.
a year?

The sale of grain in England
is going on account of the
hay markets closing & petrol pumps
taking their places. In other
words there are very few importers
who understand the value of wheat
to the farmer, in regards to what
it costs, & as part of the British

Empire, it has to be set at a maximum profitable price, as the British class of people do not want to live on the cheapest amount a nation can live on, but believe in friendliness & respectableness & some enjoyment.

There is a mistake in the parlimento that they think we want to live as Austrain peasants.

Unless Canada takes control of prices England would plunge Canada into civil war.

If you are going to a 123-131 Pool meeting at Regina I could write out a lot of causes if that is part of your business now that you are on the committee.

I thought the picture of confederation
grain exchange New York road for
itself!

I think Canada will have to go a
long way to get a better man than
The Duke of Windsor, who has been
training since the Great War for
Empire trades, at the cost of
the English Government.

I think the P.S.N.C. & the Canadian
Pacific Railway Co. would do well in
alamagating, as then they would
have an office of ^{about} 1000 men that
^{would} understand the S.K. Pools
business in England, were as one
man is hoped.

I think Mr. Davis a good representative
to set Beatty for the Wheat Pool.
as he is a clever speaker, I went
to see him in Chensdale with
Geoffrey Heigh last time I was home.

from your
loving brother
Brian

REF.
128.

POST EARLY
IN
THE DAY

Mr. G. M. Hewson.

Langbank

Sask

Canada.
