

Chester Muntal Jr.
23. 5. 59.

Dear Geoff & Susan.

Weather conditions

are excellent for Dominion day tomorrow & have been all week.

I see by the F.P. that you had a dust storm from Swift Current, but that ~~if~~ it did not reach you till dark.

I wonder if you got the Ottawa rain, it said on the wireless Quebec 3 weeks ago had 10 ft of snow, & the roads were now chad but still muddy.

I suppose the C.P.R. will now replace all their engines to 2850 in

I saw a chestnut tree in full bloom, each flower is like

a tapering cone & it was covered with them.

I was unloading in a motor truck
 Leyland Beaver, flooring 1 1/2" for
 a new floor for one of the wards.
 The driver said the planing is
 all done in one big machine
 put it in rough at one end
 & at the other it comes out
 finished under compression.

Was Wilber living at his house
 or was it rented?

I think E. Gardner has a big
 business still if he has some
 one to pass out the capital
 for him.

Dorothy & M. B. sail on Manchester.

Since July 6th, I understand
 these tickets are only for 3 months.
 I told them to get these tickets
 written out for 6 months as we
 found 3 months too short.

I do not see why Dr. Buccannon
 can use a man wrong just
 because he is a doctor, even
 if things do come out to
 our advantage in the end, ^{when told} _{1.}
 I believe honesty comes
 first, although in business
 there are ways were it does
 not affect a person, the same
 as he has me held here
 by police that are not in
 the police force, yet they seem

to count as holes.
I think on Mars the ancestors
planet there was a spark plug
not firing that caused the
hospital to go wrong.

There was a bad accident in
Crews of 5 auxiliary firmers in
a black out practice they
were driving with a trailer
of equipment when it over-
turned, two died & the
other 3 are crippled, a visitor
was here from Crews last
Saturday & told us about it.

from your
loving brother
Bray
