

Foster Cliff Farm,
Silsden Rhydy.
9.5.43.

Dear Geoff & Susan.

No letters this week.

Mother has gone to stay with Aunties & I was in Leeds on Friday & noticed quite a lot of Canadian soldiers in the town. We are getting enough rain to keep plants growing we had about 1" last night & today.

There is a play in Silsden called Hobsons choice Harold & Bas. were going to go only it made it too much of a rush by the time he got back from L. pool. A hen hatched 10 chickens white legged, the hen has trodden on two.

The war seems to be coming to a end in Africa so perhaps it will not be so long before there is a settlement of the rest.

I bought a packet of razor blades from a man in the street selling them as it is hard to get them in shops & another lady paid 5/- a dozen & the control price was 2/- for Gillette utility blades so she

called the police & he had to show his
sale permit & he took his name so I
do not know if he would get fined, anyway
he said if you can get them anywhere
else why did you not go there.

We have a bed of lily of the valley just in
flower which give off a strong perfume & any one
coming remarks on them.

I planted out 200 lettuce & have the cabbages to do
this week, the cabbage seed does not seem
much good as only a few plants have come up.

I expect the cows to sleep out any day night
now only it has been wet windy & cold
so we are waiting for it to turn warm.

One sheep had three lambs, they were all
dead when Mr. Walker found them he thinks
some stiers must have trodden on them.

from your

loving brother

Brian.
