

Experimental Stp.
Chester.

6/4/39.

Dear Geoff & Susan:

I have just had

the Press this week. We have been busy with the laundry this morning as it is Easter week, they use a horse & waggon to move it with, they could move it just as easily on a hand trolley, but I am not the supervisor.

Will you send the financial statement when you get it, I think it comes in March. I think that it should be published in time for the yearly meeting.

You are to have an eclipse of the sun on the 19th when the moon passes below the sun & makes a

shadow.

Capt Tyard sails tomorrow they have had a fire on the ship, the ship has been into dry dock.

Before they had an electric short circuit, that caused the ship to have to go to Plymouth or the Navy base for London.

Last week we had a flash of blue lightning, I was looking out of the window & it seemed to hit the ground close to me on the garden path, & then a loud peal of thunder.

I think a Bible Church Temple is needed in Silverwood.

Do you remember some time ago when a lake district North East

of Winnipeg had a very heavy crop of oats, so I was
thinking Lake Superior ^{Oats} Furbledford, would be a good
name for oats & they would have good drawing power
of moisture from the Lakes.
As the government is now handling the money for grain
crops it is necessary to have a Silverwood Bank
in the district.

Do the government get the money from a printing
works in England now that the mint system is
not used. & is all money accounted for, before it
is paid into the certified banks?
In actual practice does the government get the wheat
for just the price of the printed money? or is it
a fund depending on the amount of natural
resources for the year.

The Sunday papers are advertising excursion trips to
Canada & New York Fair & a lot of money each week
is given for free trips in connection with the entry.
Mrs. Beggstaff is going on a Manchester Liner Ship to
Lloydminster in July.

There is a man here his name is Mr. Goldie, he
is a young man retired in Warrington he has a car
big house & garden, & had a kind of relapse.
Some men two are still having injections, I would
think they will soon be turning into hedgehogs
as they two of them have had about 100 each
instead as Weyburn did one injection to one person.
I would think the doctor will have a very tortuous
time, when the reason for Doctor Fadden's death
gets known. I wrote to him two months
before his death. With love
from your loving brother Brian.

BIRMINGHAM, 11

DATE 4th February, 1939.

Mr. F. B. Hewson,
3 Centurion Drive,
Meets,
Cheshire.

Dear Sir,

We acknowledge receipt of your letter dated February 1st, and thank you for asking for certain information in regard to B.S.A. Motor Cycles.

You will no doubt appreciate that it is necessary for some calculations to be made before we can give you the cost of forwarding a machine to Longbank, but we are obtaining the information with the least possible delay, and will write to you in the near future on the subject.

Yours faithfully,

B.S.A. CYCLES LIMITED.

LRH/GJC.
